Topic

Eugenie Clark from Shark Lady was a scientist of the ocean. Today you are going to learn about food chains in the ocean and have a go at creating your own.

1. Have a look at the attached food chain powerpoint with your grown up.

Then have a go at creating your own food chains. I have attached a template with pictures to use or you can draw and create your own.

2. Have a go at playing balloon volleyball. With a partner pass the balloon to each other. If the balloon touches the floor- the shark has eaten it. Try and do as many passes as you can without dropping it.
3. Below are some shark crafts you could have a go at.

4. Remember the cosmic kids under water yoga from last week to have a go at.
