Year 1

Maths - Activity 1: Money (PRINT OFF or you could use 1 of each coin and put them in order across the table 😊)

Cut and stick the coins in the grid from smallest value to greatest value. Talk about their colour size and shape. What pictures do you notice on each? Which is your favourite coin and why?

Smallest (value, worth)

Greatest (value, worth)

Money Game to play

You will need: 1-6 dice, twenty 1p coins, ten 2p coins, four 5p coins, two 10p coins and one 20p coin.

1. You are going to make some amounts of money.
2. Throw the dice. Write down the number thrown. The number on the dice tells you how many coins to take.
3. Try to make either 10p or 20p using only that number of coins. Write the addition beside the number.
4. Throw the dice again. If you get the same number, try to make 10p or 20p in a different way from before. If it is not possible make a note. See example below.

Roll	
3	$10p + 5p + 5p = 20p$
Roll 3 again	
3	$10p + 5p + 5p = 20p$
Only 1 way to make 20p with	
3 coins
